

LayFlat

Currently, the large diameter hoses market is one of the fastest growing in the industry. In this scenario, Repsa supplies a high performance flat water transfer hose, which has been developed to be reliable, long lasting, lightweight and very flexible.

Applications

- Works for both heavy and light services.
- Transfer of water, oils, sludge, fuels, chemicals and much more.

Benefits

- Installation costs reduction.
- Assembly times reduction.
- Hose reuse and recovery for another application.
- Low weight.
- On site installation.

DIAMETER	MAXIMUM OPERATING TEMPERATURE		PRESSURE		APPLICATIONS	FLUID	PRESENTACIÓN	JOINT	
	Inches	C°	F°	PSI					KG/CM ²
6				200	14				
7				200	14	Water pipeline temporales para agua de fractura.			
8		-50/80	58/176	200	14	Cañería flexible para terrenos irregulares y para trabajo bajo condiciones severas de operación.	Fluidos abrasivos	Rollos de 200 mts	Acoples rápidos
10				200	14		Aguas residuales		
12				150	10
